

CERTIFICATE OF TRANSMISSION BY FACSIMILE (37 CFR 1.8) Applicant(s): CHABOT			Docket No. 6536-0301
Serial No. 10/707148	Filing Date 11/24/2003	Examiner GARCIA	Group Art Unit 3679
Invention: Method for Limiting the Movement of an Infant in a Particular Direction			
<p>I hereby certify that this <u>Applicant Initiated Interview Request</u> (Identify type of correspondence) is being facsimile transmitted to the United States Patent and Trademark Office (Fax. No. <u>(571)273-7083</u>) on <u>April 6, 2005</u> (Date)</p> <p><u>Ralph D. Chabot</u> (Typed or Printed Name of Person Signing Certificate)  (Signature)</p> <p>Note: Each paper must have its own certificate of mailing.</p>			

Applicant Initiated Interview Request Form

Application No.: 10/707148

First Named Applicant: Chabot

Examiner: Ernesto Garcia

Art Unit: 3679

Status of Application: pending

Tentative Participants:

(1) Ralph Chabot

(2) Ernesto Garcia

(3)

(4)

Proposed Date of Interview: April 7, 2005

Proposed Time: 11:00AM (AM/PM)

Type of Interview Requested:

(1) ☒ Telephonic(2) ☐ Personal(3) ☐ Video ConferenceExhibit To Be Shown or Demonstrated: ☒ YES☐ NO

If yes, provide brief description: draft claim

1 page Attached

Issues To Be Discussed

Issues (Rej., Obj., etc)	Claims/ Fig. #s	Prior Art	Discussed	Agreed	Not Agreed
(1) Obj	drawings		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
(2) Obj	claims 2, 4		<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(3) Rej	claims 2-5	based on 35USC112	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(4) Rej	claims 2-5	Marshall	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/> Continuation Sheet Attached					

Brief Description of Arguments to be Presented:

1. Drawing changes not required MPEP 601.01(f). 2. Claim 2 changes not required. 3. Velcro is permissible in claims.

4. Low profile adequately defined in specification MPEP§2173.05(a). 5. Marshall reference not anticipatory.

6. Discussion of new claim.

An interview was conducted on the above-identified application on _____

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

DRAFT FOR DISCUSSION

Claim 6 (new). A method for preventing an infant from moving from one area of a house to another by creating a barrier upon a portion of a floor comprising the steps of:

providing a sheeting material having a width sufficiently narrow to permit older children and adults to step over while being at the same time sufficiently wide to discourage an infant from crossing, said sheeting material having a low profile top surface design, said low profile top surface design comprising a plurality of upward extending sections having respective distal ends, said low profile top surface design having a limited height which permits older children and adults to step over and said distal ends designed to provide temporary discomfort when touched and weight applied yet is incapable of puncturing the skin of an infant; said limited height further defined as being sufficiently short so that an infant would not be able to grab and detach any of said upward extending sections;

sizing said sheeting material for the portion of said floor upon which said sheeting material is to be placed, said sheeting material sized for older children and adults to step over while still providing sufficient depth to discourage an infant from crossing; and,

placing said sheeting material upon a floor in a substantially desired location to create a barrier preventing movement of an infant from one area of a house to another.

The new claim provides a description for use of the term "low profile" found in the specification. The preamble provides the further limitation of using the barrier in a house.
